

At Kazan Palace by Tasigo, we recognize our impact on the environment and we aim to reduce it by every manner that are available without compromising the excellence in our way to welcome our guests.

For this reason, we created a programme called **Stay in harmony** including the following points.

We commit to reduce our resources consumption by monitoring and taking actions to minimize our water and energy use.

We aim to reduce our waste production and segregate when it's possible and local structures are in place to manage safely different kinds of wastes.

We take good care of our employees and provide opportunities to improve their knowledge about sustainability and ways to implement best practices during their work and when they are at home.

We are hiring local talents and we propose trainings to ameliorate their capacities and let them access managerial positions.

We encourage our staff to present **Stay in harmony** to our guests, suppliers, contractors, agents and wholesalers.

We have appointed a Green Team who is in charge of ensuring ongoing sustainability performance.

We wish to bring awareness to our guests about the topic and provide a luxury service with unforgettable experiences in the respect of the environment.

We focus on our suppliers to source local products and certified items when available.

We support the local communities to share the knowledge we managed to gather.

We aim to continuously improve our dedication to the topic and start regularly new projects in line with this policy that will be annually reviewed.
